

Advance topics in a function

1) Write a function add to add two numbers and call the function in another file.

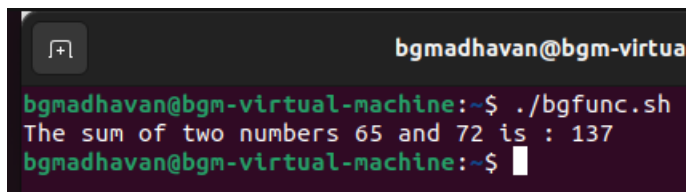

The screenshot shows a code editor with two tabs. The first tab, 'details.sh', contains the following code:

```
1 #!/bin/bash
2
3 add()
4 {
5     echo "The sum of two numbers $1 and $2 is : $((($1 + $2)))"
6 }
```

The second tab, 'bgfunc.sh', contains the following code:

```
1 #!/bin/bash
2
3 source details.sh
4
5 add 65 72
6
```

The screenshot shows a terminal window with the following output:

```
bgmadhavan@bgm-virtual-machine:~$ ./bgfunc.sh
The sum of two numbers 65 and 72 is : 137
bgmadhavan@bgm-virtual-machine:~$
```
