# Conditional execution

1) Write a script which will take your name as an input.

2) It should check this name with your system's username.

3) If the username matches, it should greet you by displaying "Hello".

4) Else, it should display "Try again"

```
cond.sh
~/

1 #!/bin/bash
2 read -p "Enter your Username : " username
3 if [ $username == $USER ]; then
4         echo "Hello $username"
5 else
6         echo "Try again"
7 fi
```

```
bgmadhavan@bgm-virtual-machine: ~

bgmadhavan@bgm-virtual-machine:~$ ./cond.sh
Enter your Username : bgmadhavan
Hello bgmadhavan
bgmadhavan@bgm-virtual-machine:~$ ./cond.sh
Enter your Username : virat
Try again
bgmadhavan@bgm-virtual-machine:~$
```
